SECURTANK SYSTEM

Our beacon is equipped with a sensitivity sensor.
In the event of an attempt to break into the fuel tank, a 110dB siren sounds instantly and a notification is sent to your smartphone.

The algorithm makes it possible to discriminate between external elements, such as wind, rain etc... while monitoring the tank.

BEACON

Stainless steel
Closing screw

110dB Siren

Stainless steel
Anti-tear screw

Stainless steel
Plate

Cap anti high
pressure jet

Battery
5 years of autonomy

Gasket (IP68)

application

CONTROLLER

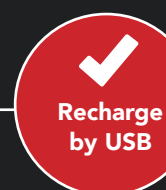

The Controller allows you to manage 1 or 2 tanks simultaneously.

It gives you their status in real time.

Magnetic mounting bracket

NOTIFICATIONS IN REAL TIME

The SECURTRUCK app allows you to view the status of each system in detail.

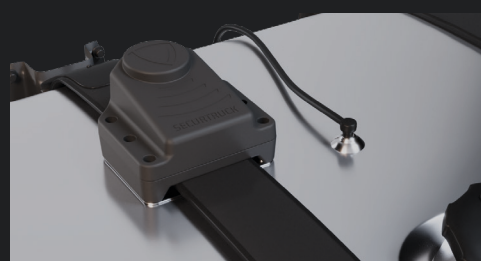

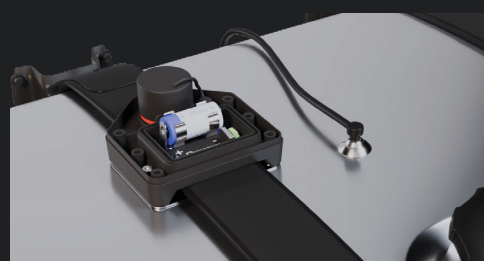

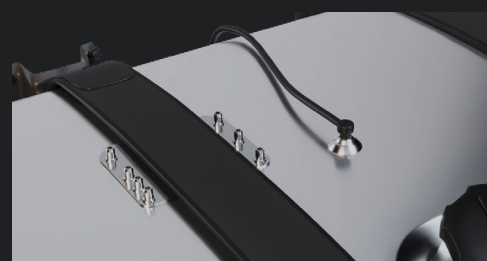

ASSEMBLY WITHOUT DRILLING AND WIRING

1 Insert the plate under a strap

2 Screw the case onto the plate

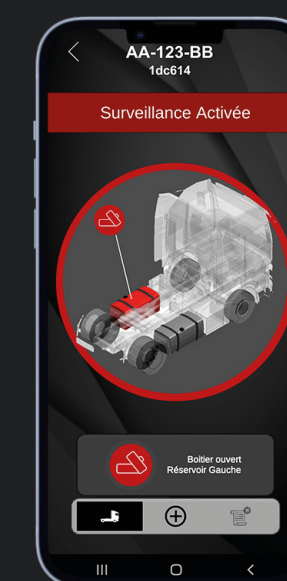

3 Close the box

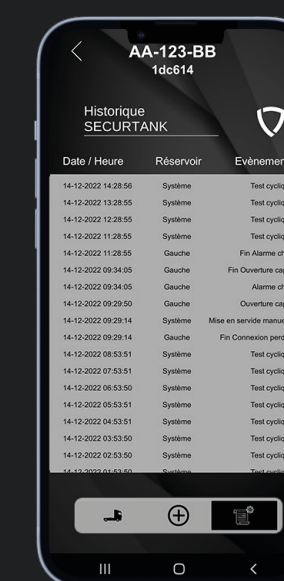

Multi-system
